

Tips for Starprim safes

Series **STARPRIM**

Security. Starprim. Primat.

SAFE STARPRIM

Are you sure that your documents, cash, jewels are well protected?

Sometimes through our life we are confronted with unpleasant happenings which will bring us many troubles and great distress.

Have you already thought about the major advantages of having a safe?

Take care of your valuables and sleep soundly!

Reduced insurance costs!

Before making any decision take advice and follow this guide when you choose your safe!

OUR ADVICE

Remember that you do not buy a safe every day! So get the right one.

We hope that this information will help you make an informed decision!

Safes that are checked – tested and certificated for quality

This guide is designed to provide you with the facts of why you should purchase a safe.

In the market, they are different kinds of safe:

- Products without certification - the quality has not been tested.
- Products with certification - the quality of the products has undergone independent testing in a laboratory.

The certified safe has on the internal door a label from the testing Institute and this certifies the quality and grade.

Within Europe the global European certifications rules EN-1143-1 have been introduced. Safes made to this standard offer varying levels of burglary resistances. The Verband der Schadenversicherer in Cologne-Germany- tests and defines the Security Grade of the safes. According to the Security Grade, the label affixed indicates the amount which can be taken into consideration for secure storage in the safe. This system of testing and certification is fully insurance approved.

| STARPRIM | | | |
|---|--|----------------|---------------|
|  | SECURITY GRADE | | |
| | According to CEN-EN 1143-1 | Commercial use | Private use |
|  |  STARPRIM 1: Burglary - resistant 30 / 50 RU | 20.452,- EUR | 63.911,- EUR |
|  |  STARPRIM 2: Burglary - resistant 50 / 80 RU | 51.130,- EUR | 102.258,- EUR |
|  |  STARPRIM 3: Burglary - resistant 80 / 120 RU | 102.258,- EUR | 204.517,- EUR |
|  |  STARPRIM 4: Burglary - resistant 120 / 180 RU | 153.388,- EUR | 383.469,- EUR |
|  |  STARPRIM 5: Burglary - resistant 180 / 270 RU | 255.646,- EUR | by agreement |

OUR ADVICE

Choose a certified safe – a quality safe.

Buying a cheaper safe is only an advantage ... until you have an unpleasant visit!

What can we place into a safe?

Example:

- Credit cards
- Cheques
- Depositor's book
- Jewellery
- Cash - Money
- Insurance policies
- Personal documents
- Collection of old coins
- Other collections
- Contracts, orders
- Invoices
- Securities
- Technical documentation
- Business documentation

OUR ADVICE

It can be helpful to make a list of all the goods that you wish to protect and that you may need to protect in the future. In order to be sure that you will have enough internal space, assemble these items in a box and see the capacity you will require.

Installation of the safe

OUR ADVICE

- The safes can be fixed onto a concrete floor.
- The safes can be installed into the wall, the floor or in furniture.

Each safe has a defined weight.

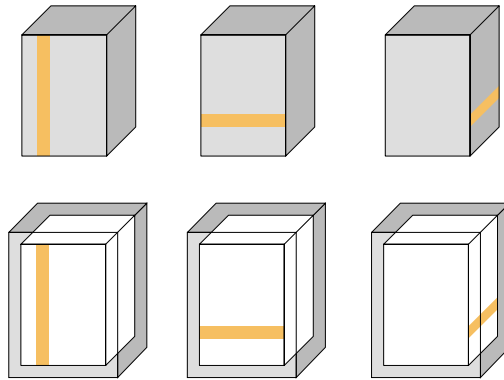

OUR ADVICE

Please pay attention to what is underneath the safe during siting and final installation. Check also if it is possible to locate the safe to the chosen position via (lift, stairs,) and that it will pass through all doorways.

Size of the safe

When you will make your list of the protectable valuables, you will be surprised of so many things.

Make sure to do the good choice and to take into account the internal and external dimensions.

OUR ADVICE

Choose always a larger safe than the type you really need.

You will always find something more to place in the safe.

With the purchase of a larger safe, you will resolve the problem for the future who may appear.

Locks of the safe

There are three standard variations of locks for the safe.

You can also combine the standard locks together.

OUR ADVICE

With a key lock, you have to take care of the keys.

With a combination lock, you have to keep in mind the code chosen by your self.

The two mentioned locks are safety.

Selection of the security grade

The selection of the security grade is a very important factor. Burglary categories are defined according to EN 1143-1 and take contact with your insurance company.

OUR ADVICE

Try to estimate the value of your goods you will place in the safe. You will be surprised of the high value.
